CUSTOMER CARE

At Uniden®, we care about you!

If you need assistance, please do NOT return this product to your place of purchase. Our customer care specialists are available to serve you.

Quickly find answers to your questions by:

1. Reading your owner’s manual, included with this product.
3. Calling our customer care specialists at 1-817-858-2900 or 1-800-658-8068.

Uniden surveillance products are not manufactured and/or sold with the intent to be used for illegal purposes. Uniden expects customers’ use of these products to be in compliance with all local, state, and federal law. For further information on video surveillance and audio recording legal requirements, please consult your local, state, and federal law.

OVERVIEW

USING THE MANUAL

This manual is set up in eight sections:

• Overview. This general section tells you how to use this manual. It also lists the system’s features.
• Getting Started. This section lists the hardware that should have been in your box and how to set it up.
• Basic Operations. This section describes your equipment’s function keys in detail. It also provides a list of basic operations in an abbreviated format, referencing screen details in the next section.
• Uniden UDR444 Screen Descriptions. Here you will find detailed descriptions of each screen and how it is used.
• Special Features. This section tells you about the UDR444 special features, such as how to connect your surveillance system to Skype™ and access it from your remote computer or other wired/wireless devices.
• Maintaining Your System. This section provides tips on how to keep your UDR444 hardware clean and in excellent working condition.
• Solving Problems. Troubleshooting tips are located here.
• Specification. This last section contains hardware and software specifications.

If any items are missing or damaged, contact our Customer Care Line immediately. Never use damaged products!

UDR444 FEATURES

• 4.3” LCD monitor with built-in rechargeable Lithium Polymer battery (up to 4.5 hours)
• Up to 500 ft. wireless transmission range
• Up to 40 ft. motion detection/night vision range
• Camera out of range alert
• Record to microSD card (4GB microSD card included but will support up to 32GB)
• Built-in microphones and speakers (cameras and monitor) support Intercom function for two-way audio communication
• IP65 weather-rated VGA resolution cameras (2 included)
• System expandable up to 4 cameras total (additional cameras sold separately)
• Simultaneous Quad view
• Digital zoom, pan, and tilt
• Schedule recording setting
• AV Out to view video on TV
• USB Out for remote Skype™ connection
GETTING STARTED

WHAT'S INCLUDED

Digital Wireless Cameras (2)  
Digital Wireless Monitor (1)  
Camera Power Adapters (2)  
Monitor Power Adapter (1)

USB Cable  
AV Cable  
CD  
User Manual

Receiver Cradle  
Screws and anchors (6 each)  
4G MicroSD Card (Adapter not shown)

If any items are missing or damaged, contact our Customer Care Line immediately. Never use damaged products!

INSTALLATION

General Placement Considerations

The cameras included with your monitor are weatherproof and have an IP65 weather rating. Water can be sprayed on them and they will still work; however, the cameras cannot be submerged underwater.

Although the cameras can be exposed directly to the rain, it is recommended that, if they are used outdoors, they be mounted under some type of cover like a patio overhang or eave. As rainwater drops start to dry on the camera glass, it can create spots that will reflect the light from the infrared LEDs used for night vision, thus causing lower quality video.

Also, as dust, grime, and cobwebs accumulate on the camera glass, they can reflect light from the infrared LED and might lower video quality. Periodically clean the lens glass with a soft cloth.

Consider the following when placing cameras:
• Clear line of sight video transmission distance is up to 500 ft.
  — Walls, especially brick and concrete, shorten the transmission distance.
  — Placement next to windows allows better transmission.
• Avoid having a direct light source in view of the camera. This includes street lights, ceiling or floor lamps, spotlights in the driveway, etc.
• The cameras are equipped with built-in infra-red LEDs so you can use night vision for 24-hour surveillance. The LEDs automatically activate at night and the picture viewed turns to black and white. The night viewing range is up to 40 ft. Avoid pointing the camera lens directly at clear glass; the night vision LEDs will cause a blurred image.
• Optimized motion detection range is up to 40 ft. The farther away an object is, the less accurate the motion detection.
• Avoid pointing the camera directly at any bushes, tree branches, or moving objects that might naturally move due to winds. Otherwise, the motion detection feature may record unnecessarily.
• Out of Range displays when the monitor and camera are too far apart. Reposition the equipment.
• A Low Battery icon displays when you need to recharge the battery.

Installing Your Monitor
Out of the box, your monitor has enough power to be used when you place and install the cameras. You can check the camera placement and angle before you physically screw the camera stands into place.

After you have installed the cameras and set up the monitor, plug the AC adapter power output cable into the 5V POWER input of the cradle or monitor. Plug the power plug into a wall outlet or surge protector.

  **If you are powering the monitor through the cradle, insert the monitor into the cradle at this point.**

Installing the Camera
You can mount the camera with the stand on the bottom (for a flat surface such as a tabletop), on the side (for a wall), or on the top (for the ceiling). When you are positioning the camera, you might want to bring the monitor along; it’s much easier to get the camera into the right position when you have the monitor handy.

Mount the Camera Base
The following tools are required:
• Electric Drill
• 5mm Drill Bit
• No. 2 Philips Screwdriver
  1. Hold the base of the camera stand where you want to mount it and mark the location of the screw holes.
2. Drill holes using the 5mm drill bit.
3. Insert anchors.
4. Use the included screws to attach the base to the wall or ceiling. You can also screw the base into a flat surface such as a tabletop if needed.

5. Before attaching the camera, tug gently on the stand to make sure it is securely in place.

Attach the camera

1. For each camera, attach the camera bracket to the mounting screw. You can attach the stand to the top or the bottom of the camera as needed. Tighten it a few turns, then turn the camera to face the direction you want.
2. Tighten the camera brace up against the camera to secure it in place.
3. Unlock the mounting post by turning the wingnut to the left a few turns.
4. Set the mounting post to the correct angle, then tighten the wingnut until the post is locked into place.
5. Attach the antenna to the rear of the camera.

Power Up the Monitor

1. Press and hold the POWER button on the left side of the monitor for 1 - 2 seconds to turn it on.
2. The monitor displays the Uniden title screen and then displays the live view.
**Power Up the Camera**

1. Connect one end of an AC adapter to the camera’s power pigtail and plug the other end into a 120 volt AC (standard indoor) power outlet.

2. Cameras provided in the kit are already paired to the monitor. Once they are powered up, the monitor displays images from that camera.

3. Adjust the camera viewing position if needed.

</tbody>
</table>
| Manually cancel a Scheduled Record        | 1. Select *Record/Schedule Record*.  
2. Select the specific day whose recording schedule you want to cancel.  
3. When that day's schedule displays, use \( \text{CH} \) or \( \text{CH} \) buttons to turn that day's schedule to *Off* (see page 25). |
| Playing back a recording on the UDR444 monitor | Press \( \text{PLAY} \). The *Play File* screen displays. See page 27 for details.                                                                                   |
| Cancel watching a recorded video         | Press \( \text{STOP} \).                                                                                                                                                                                   |
| Watching recorded video on PC or television | To view on PC: Place the UDR444’s microSD card in the PC's memory slot (microSD card adapter included). You can play the files from the card itself or copy the files to your computer and play them from that destination.  
To view on TV: Use the AV cable to connect the monitor to the TV. Use the monitor's control buttons to access the recorded video on your system's microSD card. |
| Set the date and time                    | See *System/Date&Time*, page 19.                                                                                                                             |
| Transfer a recording from the monitor's SD card to the computer. | 1. Remove the memory card from the monitor and insert it in an adapter.  
2. Insert the SD adapter into your PC.  
3. Select a destination to store the files. |
| Watch live video on your smartphone      | 1. Be sure both your home computer and smartphone/device have Skype™ accounts.  
2. Set up your home computer to view live video.  
3. Use Skype™ on your smartphone/device to call your home computer.  
4. When you are connected, you will see live video. (See page 29 for details.) |
| Adjust UDR444 volume                     | 1. Press \( \text{Vol} \) (increase volume) or \( \text{Vol} \) (decrease volume) when viewing a camera.  
2. The \( \text{Vol} \) icon displays, then turns off after 5 seconds of inactivity. |
<table>

</tbody>
</table>
Press \( \text{Menu/OK} \) to access the UDR444 system menu options. Use the navigating buttons to navigate up/down/left/right in the menu, and press \( \text{Menu/OK} \) to confirm a setting.

The Main menu options are:

- Alert
- Power Save
- System
- Camera
- Record

1. Press \( \text{CH} \) or \( \text{CH} \) to change options. The icon for the selected option enlarges.

2. Press \( \text{Menu/Ok} \) to select that option.

**Alert**

This option allows you to set the alert volume for the unit. There are 6 levels plus off. [Default = Off (mute)].

Press \( \text{CH} \) or \( \text{CH} \) to increase or decrease the alert volume.
POWER SAVE
This option allows you to enable/disable the Power Save function. Enable this function to turn off the LCD backlight after 2 minutes of inactivity. The monitor "wakes up" if it detects motion or if you press any key. (Default = Off)

SYSTEM
These system setup options allow you to configure your system according to your personal preferences. Use the directional arrows to select one of the six options:

- Date & Time
- Brightness
- Format
- Default
- Language
- AV Out
Date & Time

The Month option is automatically selected when you select Date & Time.

1. Press ▲Vol or ▼Vol to scroll through the options for that selection.
2. Press CH or CH to switch to another section of the date or time. Press ▲Vol or ▼Vol to scroll through the options as before.
3. Press MENU/OK to save the current setting and return to the System screen.

   Time displays in "Military" time (i.e., 00-24 hours). For example, 14:30 would be 2:30 PM/

Brightness

This option allows you to change the LCD brightness. There are 6 brightness levels. (Default = 3)

1. Press CH or CH to increase/decrease the brightness level (0 - 6).
2. Press MENU/OK to save and return to the System screen.

Format

This option allows you to format the external storage (microSD) card, deleting all files on that card. (Default = No)

   Be careful when using this feature. All files on the microSD card will be erased.
1. Insert a microSD card into the monitor if needed.
2. Select Yes, then press Menu/OK.
3. FORMAT displays; once formatting is complete, the System screen displays.
   
   If you try to format the microSD card but no microSD card is inserted, NO SD CARD displays.

Default
This option allows you to restore the UDR444 to factory settings. (Default = No)

   Camera pairings and date/time settings are not affected by a reset.

1. Press ▲Vol or ▼Vol to select either No or Yes for this option.
**Language**

This option allows you to select the display language for the system. (Default = English)

![Language screen](image)

1. Press ▲ Vol or ▼ Vol to select a language.

**A/V Out**

This option allows you to select the TV output format. (Default = NTSC)

*NTSC is the TV standard in North America.*

![A/V Out screen](image)

1. Press ▲ Vol or ▼ Vol to select either NTSC or PAL for this option.
2. Press MENU/OK; the System screen displays.

**CAMERA**

This option allows you to pair the monitor with up to 4 cameras or turn on/off individual channels (cameras). Press ▲ Vol or ▼ Vol to select PAIR or On/Off for this option.

*The two cameras that come with your system are paired to the monitor at the factory.*

![Camera screen](image)
**Pair**

Select this option if you are pairing accessory cameras or changing a camera's channel assignment.

1. Press ▲Vol or ▼Vol to select the camera you want to pair to the monitor.

2. Press **MENU/OK**.

3. An information message displays, indicating that you have 30 seconds to press the pairing button on the front of the camera.

4. The camera video displays when that camera has paired.

**On/Off**

This option allows you to turn an individual channel on or off. The camera will remain powered on but the monitor will no longer receive video and audio.

1. Press ▲Vol or ▼Vol to select the channel whose status you want to change.
2. Press \(\text{CH} \) or \(\text{CH} \) to change the setting (On or Off).

3. Press MENU/OK to confirm the setting. The main Camera screen displays.

**RECORD**

The Record screen contains 5 sub-screens that help you establish the quality level of your recordings and a repeatable one week recording schedule.

- Video Quality
- Trigger Recording Time
- Motion Sensitivity
- Schedule Recording
- Overwrite

**Video Quality**

This option allows you to preset the output video quality for the unit. (Default = Low \(320 \times 240\))

1. Press \(\text{▲ Vol} \) or \(\text{▼ Vol} \) to choose between higher quality (High \(640 \times 480\)) and lower quality (Low \(320 \times 240\)) video output.

2. Press MENU/OK. The Record screen displays.

**Trigger Recording Time**

Various things can alert the system to begin recording. These triggers range from the wind blowing a tree branch into tan outside camera's line of sight to someone walking into a
room. This option lets you set how long the system will record once it has been triggered. (Default = 30 s)

1. Press ▲ Vol or ▼ Vol to select the recording time.
2. Press MENU/OK.

*If you select Off, the system won’t start to record, even if a trigger occurs and motion detection is enabled.*

*If you select a recording duration (15, 30, or 60 seconds), 📸 displays during recording.*

3. The Record screen displays.

**Motion Sensitivity**

This option allows you to set the motion sensitivity for each channel individually. For example, if Camera 1 is an outside camera, you could set the sensitivity lower. This could keep the cameras from triggering over small movements, such as the breeze moving a tree branch. (Default = Low)

1. Press ▲ Vol or ▼ Vol to select the channel whose sensitivity you want to adjust and press MENU/OK.
2. The camera's sensitivity levels display on the next screen. Select the sensitivity level and press **MENU/OK**.

![Camera Sensitivity Levels](image)

3. The *Motion Sensitivity* screen displays again.

**Schedule Recording**

This option allows you to create a weekly recording schedule. This weekly schedule repeats until you change it. You can set each day separately, and you can also set that day's schedule to turn on or off. For example, if you have camera 1 set to record your back yard every evening from 20:00 hours (8:00 PM) until 23:00 hours (11:00 PM) but you will be having a party in the back yard that evening, you can turn off that day's scheduled recording. (Default = Monday / Start Recording Time:00:00 / End Recording Time: 00:00 / Off)

1. From the *Record* screen, select *Schedule Recording* and press **MENU/OK**. The *Schedule Recording* screen displays. Select a day and press **MENU/OK**. The start and end time setting screen for that day displays.

![Schedule Recording Screen](image)

2. Using ▲ **Vol** or ▼ **Vol**, scroll to set the recording start and end times. Press **CH** after each selection to move to the next. For example, set Start Recording Time - Hours, then press **CH** to move to Start Record Time - Minutes.

3. After you set *End Recording Time* and press ▶; set the recording schedule for that day on or off. Use the directional arrows (**CH** or **CH**) to select **On** or **Off**.

4. Press **MENU/OK** to set your selection. The *Schedule Recording* screen displays.
Overwrite

When the microSD card is full, the new video recording overwrites the oldest video recording. Select Yes to enable this function. (Default = No)
SPECIAL FEATURES

RECORDING VIDEO

Video records on the 4GB microSD card included in your package (the UDR444 will support up to a 32GB microSD card). You can set up a recording schedule so the UDR444 records automatically (see page 25), or you can manually start recording.

Manual Recording

*Be sure a microSD card is inserted into the microSD card slot.*

1. Press Manual Rec on the top of the monitor. The monitor records in 10 minute blocks.

*In Recording mode, only the TALK button and sound are active.*

When there is new recorded file, (yellow) flashes on the LCD screen. When the microSD card is full, (red) flashes.

VIEWING RECORDED VIDEO

1. Press to enter the Play File list.
2. Select the Video folder and press .
3. That folder contains other folders sorted by date (Format = YYMMDD). For example: 120330 means the videos in this folder are recorded on March 30th, 2012. Press or to select a folder you want to view and press MENU/OK to open that folder and browse the files inside.

*If there are multiple pages of folders, press to move to the next page.* Press to return to the previous page.
4. Inside that folder are record files, sorted by time. For example: 123030_1 means the video is recorded at 12:30:30 and from camera 1.
5. Select the video you want to view and press MENU/OK. The video plays on the LCD screen.
6. Use the navigation buttons to manage the video:
   - ▲Vol - Pause, play video
• ▼Vol - Stop
• ▲ - Forward (up to x16 speed)
• ▼ - Backward (up to x16 speed)
•  - Exit the video
•  - After you exit the video, exits Playback function

DELETING RECORDED FILES
You can delete a specific recorded videofile or an entire folder of files. A red "X" displays to the right of folders and recorded video files on the Play File screen.

1. Press to highlight the red "X" beside the folder or file you want to delete. Press MENU/OK.
2. A confirmation screen displays. Use or to select Yes. Press MENU/OK.

USING THE INTERCOM
The Intercom feature lets you talk to whomever is within camera range.

1. Make the camera you want to establish an intercom link with the full screen live view camera.
2. Press and hold  on the monitor.
3. Speak clearly into the microphone.
4. Release  to listen to the response.

VIEWING LIVE VIDEO
The Uniden UDR444 let you view live video from your system on your television or home PC. You can also use Skype™ to view your system on a remote PC or wireless devices such as an iPhone®, iPad®, or Android™ smartphone or tablet.

Viewing On Your TV
1. Connect the monitor to your television using the AV Output cable (included).
2. The monitor screen goes blank and the TV screen displays the camera output.

   The monitor controls still operate while the system is connected to the TV. You can change cameras, set the cameras to scan through each in sequence, etc.

Viewing On Your Computer
1. Insert the CD included in your package into your PC.
   For Windows: Select the USB Driver file and double-click to run the program.
   For MAC: Double-click on the .MAC driver to release the ZIP file. Locate the PKG file and double-click to run the program.
2. For Windows: Follow the instructions from the InstallWizard. Select Finish to complete the installation. Found New Hardware displays.
For MAC: Follow the instructions on the screens. Select Close to complete installation. An Installation Successful screen displays.

3. Connect your home computer to the monitor with the USB cable (included). The monitor screen goes blank and the PC displays the camera video. Your UDR444 system is now connected to your home PC.

**Viewing on Your Wireless Device or Remote Computer**

**Setup**

1. Follow the procedures to view live video on your computer (see page 28).
2. Set up a Skype™ account linked to your UDR444. Please refer to www.skype.com for details on setting up this free account.
   
   *Be sure the Skype™ account is set to "Auto Answer."

3. Set up a Skype™ account on your wireless device or remote computer.
4. Invite the other Skype™ account into your contacts; accept the invitation from the invited account.

**Viewing**

1. Determine which camera you want to be available for remote viewing. Set it as the Live view camera (see page 14).
2. If you have not already installed the USB driver, install it now (see page 28).
3. Connect the UDR444 to your home computer using the USB cable.
4. Activate Skype™.
5. From your wireless device or remote computer, call the Skype™ account for the UDR444. Because that account was set up with Auto Answer, you should see live video from the camera you set up in Step 1.

   *You must have a separate Skype™ account to call the home computer. You cannot use your home computer's Skype™ account to call itself.*

**VIEWING RECORDED VIDEO ON YOUR COMPUTER**

The files that record on the UDR444 record onto the microSD card in AVI format. You can take that card and play it on your computer. You will need:

- UDR444 microSD card
- MicroSD card adapter for laptop (included) or SD card reader for other systems (not included)

1. Remove microSD card from the UDR444. Place it in the adapter and insert adapter into your PC.
2. Navigate to the SD card on your system.
3. Select the files you want to view and click Open.
4. The files begin playing, in order, through your default media player.

**PAIRING ACCESSORY CAMERAS**

The two cameras that come with your UDR444 are paired to your monitor at the factory. If you add cameras, install them and then pair the camera to the monitor.

1. Press **MENU/OK** to bring up the System screen.
2. Select the Camera option.

3. Select **Pair** and then press **MENU/OK**. The Pair screen displays. The pairing function assigns each camera to a different channel on the wireless monitor (up to 4 cameras), and is necessary for configuring additional cameras.

4. Select the channel you want to pair the camera to and press **MENU/OK**. The **Press Pair Key** message screen displays.

5. Within 30 seconds, press **PAIR** on the camera’s face. Once the camera pairs to the monitor, it will be immediately viewable on the monitor.
MAINTAINING YOUR SYSTEM

MONITOR
As you use your monitor, keep the screen clean by wiping it with a microfiber cloth to remove fingerprints, dust, etc.

CAMERAS
When dust and grime builds up on the camera lens and glass, it affects night vision capability. The infrared light reflects off of the dust and grime, limiting the camera’s “vision.” Use a microfiber cloth to regularly clean the cameras or when night vision video is cloudy or unclear.
## TROUBLESHOOTING

If you have problems with the system, there is often a quick and simple solution. Please try the following:

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>No picture</td>
<td>• Check all camera connections.</td>
</tr>
<tr>
<td></td>
<td>• Verify that the AC adapter is plugged in.</td>
</tr>
<tr>
<td></td>
<td>• Make sure the monitor is ON.</td>
</tr>
<tr>
<td></td>
<td>• Make sure the camera is in range.</td>
</tr>
<tr>
<td>The picture keeps dropping</td>
<td>• Move the camera closer to the monitor.</td>
</tr>
<tr>
<td></td>
<td>• Reposition the camera, monitor, or both to improve reception.</td>
</tr>
<tr>
<td>No sound</td>
<td>• Increase the volume.</td>
</tr>
<tr>
<td></td>
<td>• Make sure there is sound within range of the camera’s microphones.</td>
</tr>
<tr>
<td>Loud, screeching noises (Audio feedback)</td>
<td>Move the camera and the monitor farther apart.</td>
</tr>
<tr>
<td>The picture is choppy</td>
<td>• Move the camera and monitor closer to each other.</td>
</tr>
<tr>
<td></td>
<td>• Remove any obstructions between the camera and monitor.</td>
</tr>
<tr>
<td>The picture appears grainy (using AV Out to view on TV/Monitor)</td>
<td>• View files on a smaller TV/PC monitor.</td>
</tr>
<tr>
<td></td>
<td>• Try viewing through your TV’s Picture-In-Picture function, if available.</td>
</tr>
<tr>
<td>Recording problems</td>
<td>• Make sure the microSD card is inserted correctly.</td>
</tr>
<tr>
<td></td>
<td>• Check that the microSD card memory is not full.</td>
</tr>
<tr>
<td></td>
<td>• Verify that the microSD card is compatible with the UDR444. It can support up to 32GB microSD card.</td>
</tr>
</tbody>
</table>

Recycling and Disposal Information

- Do not dispose of electronic devices or any of their components (especially batteries and LCD displays) in your municipal trash collection.
- Consult your local waste management authority or a recycling organization like Earth911.com to find an electronics recycling facility in your area.
- If you are unable to locate proper recycling facilities in your area, please return this product to Uniden for recycling.
FCC Compliance Information

Part 15 Compliance Statement
This device complies with Part 15 of the FCC Rules. Operation is subjected to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with limits for a Class B digital device, pursuant to Part 15 of the FCC rules and ETSI (EN) 300328. These limits are designed to provide reasonable protection against harmful interference in residential installations. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television equipment reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

► Reorient or relocate the receiving antenna.
► Move the equipment away from the monitor.
► Plug the equipment into an outlet on a circuit different from that to which the monitor is connected.
► Consult the dealer or an experienced radio/television technician for additional suggestions.

CAUTION! Any changes or modifications to this equipment not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

RF Exposure Information
The antenna used for this transmitter must be installed to provide a separation distance of at least 20 cm (7.9”) from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter.

IC Compliance Information

Radio Equipment Notice
The term “IC:” before the radio certification number only signifies that Industry Canada technical specifications were met. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired
operation of the device. “Privacy of communications may not be ensured when using this device”.

**CE Compliance Information**

Products with CE Marking comply with EMC Directive (2004/108/EC); Low Voltage Directive (73/23/EEC); R&TTE(1999/5/EC) issued by the Commission of the European Community. Compliance with these directives implies conformity to the following European Norms:

- EMC: EN 301 489
- LVD: EN 60950
- Radio: EN 300 328

**One-Year Limited Warranty**

*Important: Evidence of original purchase is required for warranty service.*

WARRANTOR: UNIDEN AMERICA CORPORATION (“Uniden”) ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials & craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate & be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner’s manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit & return it to you without charge for parts, service, or any other cost (except shipping & handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit.

THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE & ENTIRE WARRANTY PERTAINING TO THE PRODUCT & IS IN LIEU OF & EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED
WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

LEGAL REMEDIES: This warranty gives you specific legal rights, & you may also have other rights which vary from state to state. This warranty is void outside the United States of America & Canada.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner’s manual you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). Disconnect the battery from the Product & separately secure the battery in its own separate packaging within the shipping carton. The Product should include all parts & accessories originally packaged with the Product. Include evidence of original purchase & a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, to warrantor at:
